CETOX S
Road Maintenance And Crack Sealing Slurry

DESCRIPTION:
Is ready to use compound based on bitumen emulsion modified with chemicals additives and filling materials for the repair of road surface damages not deeper than 5mm and cracks wider than 0.3 mm.

ADVANTAGES:
Has a high bonding strength to concrete and asphalt surfaces and also has very high abrasion resistance.
Is self - leveling allowing easier and quicker distribution and penetration far into the cracks without any tendency to pile up or bridge over the cracks.
Seals the whole surface, fill pits and cracks in one operation.
In insoluble water after curing and cannot be washed off even when it heavily rains a short time after application.
Is quick curing and allows opening to traffic a short time after application.
Improves the surface skid resistance and keeps roads in good condition.
Meets all requirements of roads construction.
Can be applied to bituminous and concrete surfaces.
Is cost saving.

TECHNICAL DATA :

<table>
<thead>
<tr>
<th>Density</th>
<th>1.30 ± 0.05 kg/ L</th>

<tr>
<td>Final dry</td>
<td>48 hours</td>
</tr>
</tbody>
</table>

DIRECTIONS FOR USE :
Remove all loose material from the pavement surface and cracks with brooms and compressed air.
Stir CETOX's slurry well to obtain a homogeneous mix, pour it into the cracks and level with a hand squeegee. If cracks are numerous, slurry seal the whole area.
Sprinkle the slurry surface 15-20 minutes after its application with sand to prevent pick - up traffic.

STORAGE :
6 months under suitable storage conditions .

PACKAGES :
40kg
