ALKYD
TRAFFIC PAINT CMB

Special Alkyd Paints For Marking Roads
Complies With E.S.S 794 / 1995

DESCRIPTION :
- Ready-to-apply paints, one component, based on alkyd polymers, pigments and special filling materials, which have high resistance to atmosperic conditions, chemicals and fuel attack.

FIELDS OF APPLICATION :
- Marking Concrete and asphalt flooring of roads, high ways, garages, parking areas and playgrounds.

ADVANTAGES :
- Resistant to all weathering conditions.
- Resistant to chemicals, fuels, oil and water.
- Fast colours.
- High resistant to friction.
- Can be applied on both concrete and asphalt flooring.
- Easy to use.

TECHNICAL DATA :
- Solid content (by weight) : >65 %
- Specific gravity (kg / L ) : 1.35 ± 0.02 black , 1.65 ± 0.05 white, yellow
- Viscosity (at 25°C) : 110 - 150 sec ( FC / 4 )
- Suggested D.F.T : 150 - 200 micron
- Rate of use/coat : 250 gm/m² coat
- Tack free (at 20°C) : 10 - 15 minutes
- Hard drying time (at 20°C) : 45 - 60 minutes
- Colours : black - white - yellow
- Abrasion resistance : not less than 1500 cycles at 25°C
- DFT = 150 microns - load 750 gm - wheel C S 10 (TABER apparatus)

DIRECTIONS FOR USE :
- The surface to be coated, should be free of dust, oil grease and loose particles.
- Apply one coat or more according to the required specifications by using brush, roller or sprayer.
- The used tools should be cleaned with KEMSOLVE 22 C.

PACKAGES :
- 4 kg. & 16 kg.
