**Kemtekt 20**

Acrylic water repelling Product for Brick, Stone, Concrete Against Humidity And Water Penetration

**Description:**

- **KEMTEKT 20** is low viscosity product based on transparent acrylic solution.

**Fields of Use:**

- Suitable for the archeological and historical buildings.
- Impregnation for brick, stone, concrete walls to protect against humidity, dirt and pollution.

**Advantages:**

- Good protection for stones, bricks and concretes, subjected to bad weathering conditions.
- Colorless and invisible material which does not affect the shape or the colour of the surface.
- Increasing the supposed age for old and archeological buildings.

**Technical Data:**

<table>

<tr>
<td>Rate of use</td>
<td>3-5 m² / kg / coat (according to surface porosity)</td>
</tr>
</tbody>
</table>

**Directions for Use:**

- The surfaces must be clean and free from dust, oils and any other contamination.
- The package should be well stirred before use.
- Apply one or more coats according to surface porosity.

**Safety Precautions:**

- Application should be carried out in a well ventilated place.
- Gloves, protective clothing and eye goggles should be worn during application.
- Skin contaminations should be immediately cleaned with plenty of water.
- If the material is splashed into the eyes, they should immediately washed with water, and then report to an eye specialist.

**Storage:**

- 6 months under suitable storage conditions.

**Packages:**

- 1 kg, 5 kg, 20 kg
