UNDER COAT

Anticorrosive Coating For Chasis

**DESCRIPTION:**
- UNDER COAT is an anticorrosive seal coating for the protection of lower surfaces of car bodies. It is based on bitumen modified with special resins.

**FIELDS OF USE:**
- Protects the interior or exterior surfaces of steel from corrosion resulting from the effects of salts.
- UNDER COAT is an ideal paint for lower body surfaces of cars and also other metallic parts which are not painted with nitrocellulose paint.

**ADVANTAGES:**
- Ready to use without dilution
- Easy to apply, and flows smoothly on steel surfaces without the need of heating or melting.
- After drying it produces an elastic homogenous film.
- It protects the steel surface from the corrosion resulting from salt and dirt.

**TECHNICAL DATA:**

<tr>
<td>Density</td>
<td>1.10 ± 0.05 kg/L</td>
</tr>
<tr>
<td>Hard drying</td>
<td>not more than 8 hours</td>
</tr>
</tbody>
</table>

**DIRECTIONS FOR USE:**
- Mix well the contents of the can before use.
- The surface of the steel should be carefully cleaned from oil, grease, dust and then sanded.
- Apply one coat of UNDER COAT by means of dry brush.
- A second coat can be applied if necessary, after first coat has completely dried.

**RATE OF USE:**
- 1 kg, covers 1 - 2 m² according to the condition of surface.

**PRECAUTIONS:**
- Application should be carried out in a well ventilated place.
- Gloves, protective clothing and eye goggles should be worn during application.
- Skin contaminations should be immediately cleaned with soap and plenty of water.
- If the material is splashed into the eyes, these should be immediately washed with water, and then report to an eye specialist.
- Do not eat or smoke during use.

**STORAGE:**
- 12 months under suitable storage conditions.

**PACKAGES:**
- 1 kg and 4 kg.
